We hereby guarantee that Huazhun Technology Co., Ltd. complies with the OECD's "Due Diligence Guidelines for Mineral Supply Chains in Conflict-Affected and High-Risk Areas," an equally recognized due diligence framework. We conduct due diligence on our suppliers to determine which smelters and refineries can be verified as having systems for responsibly sourcing minerals that meet current global standards, and we prohibit conflict minerals originating from high-risk areas. We will conduct reasonable investigations into the sources of conflict minerals in our products. Our raw materials and components are sourced from multi-tiered suppliers; we do not directly purchase minerals from mines, smelters, or refineries. In fulfilling our corporate social responsibility, we are committed to thoroughly investigating our supply chain and regularly reviewing the sourcing of materials to ensure the availability of metals such as tin (Sn), tantalum (Ta), tungsten (W), gold (Au), cobalt (Co), copper (Cu), graphite (C), lithium (Li), nickel (Ni), and natural mica. To ensure that the minerals originate from OECD requirements or have excluded minerals from conflict-affected and high-risk areas as defined by equivalent recognized organizations.
